

Sphynx Energy Academy Ltd

“I am all I need “

Here is an overview of how I want to structure and develop the programs under Sphynx Energy Academy Ltd:

1. Program for Skilled Workers (30 days):

- Title: Technical Drawings and Working Methods in Construction for Skilled Workers
- Content:
 - Video sessions covering technical drawing principles, construction methods, EV charger installations, substations, and BESS projects
 - Live Q&A sessions with industry experts

Every Tuesday, Wednesday and Thursday evenings.

- 4 days of on-site practice for observation and assistance
- Learning Objectives:
 - Develop skills in technical drawings and working methods relevant to construction projects
 - Gain knowledge about EV chargers, substations, and Battery Energy Storage Schemes
 - Understand safety practices and industry standards in the field

2. Transition to Working Supervisor (30 days):

- Title: Transitioning to a Working Supervisor in Construction
- Content:
 - Video sessions on leadership, team management, and project documentation
 - Live training sessions on communication, problem-solving, and supervisory responsibilities

Every Tuesday, Wednesday and Thursday evenings.

- 4 days of on-site practice focusing on supervisory tasks and documentation
- Learning Objectives:
 - Develop leadership skills necessary for a supervisory role

- Learn about daily documentation requirements and project management as a supervisor
- Gain hands-on experience in a leadership capacity on construction sites

3. Become a Site Manager (30 + 15 days):

- Title: Site Management from Site Setup to Completion

- Content:

- Video sessions covering project planning, budgeting, risk management, and site completion
- Live discussions on career paths in site management and industry insights

Every Tuesday, Wednesday and Thursday evenings.

- 4 days of on-site practice focusing on site management tasks and responsibilities

- Learning Objectives:

- Understand the roles and responsibilities of a site manager from setup to completion
- Develop skills in project planning, budgeting, and risk management
- Explore career opportunities within the construction industry, particularly in site management

By following this structure and incorporating video sessions, live interactions, and on-site practice, Sphynx Energy Academy Ltd can offer comprehensive training programs that cater to individuals looking to advance their careers in the construction and energy sectors.

By scheduling the on-site practice predominantly on Saturdays, participants can engage in practical learning experiences without conflicting with their weekday commitments. This structured approach can provide a comprehensive and immersive learning experience for individuals looking to advance their careers in the construction and energy sectors through Sphynx Energy Academy Ltd.
